Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1648

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 16-32, drawn to SEQ ID NO: 1, classified in Class 424, subclass 208.1.

II. Claims 16-32, drawn to SEQ ID NO: 4, classified in Class 424, subclass 208.1.

III. Claims 16-32, drawn to SEQ ID NO: 9, classified in Class 424, subclass 208.1.

IV. Claims 16-32, drawn to SEQ ID NO: 15, classified in Class 424, subclass 208.1.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-IV are drawn to multiple sequences. Each of the different sequences are independent and distinct inventions because the claimed compounds do not share a common utility nor share a substantial structural feature disclosed as being essential to that utility. Accordingly, these sequences are each subject to restriction under 35 U.S.C. § 121. Applicant is required to elect a single sequence, which if determined to be patentable, would also be patentably distinct from other sequences.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art because of

Art Unit: 1648

their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: each of the variants of the sequences set forth in Groups I-IV is considered to be a species of the specific, recited, SEQ ID NO.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant

Art Unit: 1648

must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conference on 05 May 2005 with John Behringer, allowable subject matter was discussed. Specifically, if the claims were amended to the sequence that was allowed in the composition claims of the parent application, now US patent 6,706,859, such method claims would be allowable.

Papers related this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG (November 15, 1989).

The Group 1600 Official Fax number is: (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center representative whose telephone number is (571)-272-1600.
